

**TWO-HYBRID ASSAY THAT DETECTS  
HIV-1 REVERSE TRANSCRIPTASE DIMERIZATION**

**Abstract of the Disclosure**

5 This invention provides methods of determining whether a compound inhibits HIV-1 reverse transcriptase. This invention provides methods of determining whether a compound inhibits formation of a complex between a p66 and p51 subunit  
10 polypeptides of HIV-1 reverse transcriptase. This invention provides a method of determining whether a compound enhances formation of a complex between a p66 and p51 subunit polypeptides of HIV-1 reverse transcriptase. This invention provides methods of determining whether a compound inhibits  
15 formation of a complex between two p66 subunit polypeptides of HIV-1 reverse transcriptase. This invention provides methods of determining whether a compound enhances formation of a complex between two p66 subunit polypeptides of HIV-1 reverse transcriptase.
